

Design space — what this deck closes vs what remains

split BY layer-type

decode-side layer-type

THIS DECK — closed.
sim → binary → graduated → coordinated
all lose to step-level (agnostic).
→ granularity (D) is fundamental.

✓ closed here

prefill-side layer-type

separate track — under verification.
(not shown in this deck)

→ future

split BY phase-size

workload-regime phase-size

separate track — in progress.
tuned-uniform · SLO-aware
(dynamic split by measured latency)
(not shown in this deck)
